DETAILED ACTION

1. The application has not been checked to the extent necessary to determine the presence of all possible typographical and grammatical errors. However, Applicant's cooperation is requested in correcting any errors of which he/she may become aware in the application.

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Brozovich et al. (US 5,661,434). Brozovich et al. discloses a multistage amplifier (Figs. 2A-B), comprising: an input power source circuit for providing an input signal (signal input at port 34); a front-stage matching network (29) receiving power provided by the input power source circuit; a mid-stage network (including: Amp1, Amp2...Ampn; and matching networks 30, 31) connected in back of the front-stage matching network and receiving power transferred by the front-stage matching network, wherein a plurality of single-stage amplifiers (Amp1, Amp2...Ampn) and a plurality of mid-stage matching networks (30/31...) are in the mid-stage network; a back-stage matching network (the last output matching network - 32) connected in back of the mid-stage network; and an

Application/Control Number: 10/775,198

Art Unit: 2819

output circuit (the load or a circuit that is receiving the signal output) connected in back of the back-stage matching network.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Shimura et al. (US 5,889,434).

Regarding claim 1, Shimura et al. discloses an n stage amplifier (where n is an integer number of at least two - see the abstract), comprising: an input power source circuit for providing an input signal at port 3; a front-stage matching network (4) receiving power provided by the input power source circuit; a mid-stage network (1, 7, 2...) connected in back of the front-stage matching network and receiving power transferred by the front-stage matching network, wherein a plurality of single-stage amplifiers (1, 2...n) and a plurality of mid-stage matching networks (matching networks 7) are in the mid-stage network; a back-stage matching network (9) connected in back of the mid-stage network; and an output circuit (a load or an external circuit that receives the output signal at port/terminal 10) connected in back of the back-stage matching network.

Regarding claim 2, Shimura et al. discloses that every mid-stage matching network (matching networks 7) is clipped or coupled between two single-stage amplifiers (1/2).

4. Claims 3-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 11-15 are allowed.

Application/Control Number: 10/775,198

Art Unit: 2819

5. The prior art made of record and not relied upon is considered pertinent to

applicant's disclose (see cited references on USPTO-892 Form attached).

6. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Khai M. Nguyen whose telephone number is 571-272-

1809. The examiner can normally be reached on 9:00 - 5:30 Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Michael Tokar can be reached on 571-272-1812. The fax phone number for

the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
